

Iowa Total Care

System Configuration Issues/Projects

Updated: 07.22.2024

In an effort to provide ongoing communication, Iowa Total Care will provide weekly updates to confirmed system configuration issues that may impact claims processing and payment.

Below outlines information related to known system configuration issues ITC has identified and is currently working to correct. This process includes analysis, root cause identification, system correction and claim reprocessing. Issues will remain on the log up to 30 days after completion**.

This grid is not intended to be an admission of guilt, ITC strives towards issue resolution through analysis, root cause identification, system reconfiguration, and claim reprocessing, as applicable. These items may or may not impact individual providers who should consult their individual Provider Relations Representative with any questions or concerns. Use our website for current Provider Relations Representative contact information at:

<https://www.iowatotalcare.com/territory-maps.html>

* The date the system correction is in place and functioning as required. Once an issue is identified, claims will be manually priced or held until the system correction is complete.

** All previously received claims will be reprocessed following the system completion date. Providers should be paid for reprocessed claims by the beginning of the next week, once reprocessing begins, ITC will update when payment is expected to be complete.

Known System Issue	Brief Description	Date Issue First Identified	Status	Provider Types Impacted	Number of Providers Impacted	Expected System Completion Date *	Expected Reprocessing of Claims Date **
<i>4 open item configuration in process</i>
